

Thermapen Classic thermometer with strong penetration probe

Thermapen Classic strong penetration probe thermometer offers the same advantages as the Thermapen Classic thermometer, but with a general purpose strong temperature probe rather than the reduced tip. It is suitable for insertion into solids as well as liquids.

Thermapen® Classic penetration probe thermometer has a large digital display and a precise read-out range of -49.9 to 299.9 °C with a 0.1 °C resolution. If necessary, a switch in the battery compartment can be used to reduce the resolution to 1 °C. The thermometer will shut down automatically after ten minutes to conserve battery life. If not needed, this feature can be turned off. When applicable, both a low battery (icon) and an open circuit indication are displayed.

Specifications	Details
Weight	97 grams
Dimensions	19 x 47 x 153mm
Display	14.5mm LCD
Battery Life	1500 hours 
Battery	2 x 3 volt CR2032 lithium coin cell
Resolution	0.1 Â°C or 1Â°C - user selectable
Range	-49.9 to 299.9Â°C
Accuracy	Â±0.4Â°C (-49.9 to 149.9 Â°C) or Â±1%
