

Waterproof Legionnaires' or Legionella thermometer kit - IP66/67

Legionnaires' Thermometer Kit or Legionella thermometer kit with IP66/67 Thermo Waterproof thermometer. This Waterproof Legionella Testing Thermometer Kit can be used to monitor the temperature of standing water as well as the surface of pipes and tanks in the water system. The penetration probe can also be used to check the temperature of the water in the faucet. The immersion probe should be immersed in water to a depth of at least 25mm; the ribbon surface probe can be used to take the temperature of pipes and tanks; and the wire probe can be used to reach awkward places or where the other probes are ineffective. This kit includes a traceable calibration certificate.
