

Kennedy 100x25x11/5mm AL/OX FINE SLIP STONE

Oilstones A comprehensive range of bench stones and sharpening stones to cover a wide variety of sharpening and honing applications. Most of the shapes and sizes are available in fine, medium and coarse grades. Available in aluminium oxide or silicon carbide, all stones can be used wet or dry to produce sharp cutting edges or to remove burrs. Aluminium Oxide: Man-made abrasive which is extremely tough enabling high speed penetration of high tensile materials without causing excessive fracturing. This resistance to fracturing makes it a versatile material suitable for general sharpening and honing applications. Silicon Carbide: Man-made abrasive with very hard, sharp particles. This makes it ideal for non-ferrous metals, hard surfaces, alloys and cemented carbides. Also used on stone, marble, glass and plastics. A superior abrasive that is able to penetrate and cut quickly with only light pressure being applied. Aluminium Oxide For sharpening curved edge cutting tools.

Specifications	Details
SKU	KEN2553000GTSK
Abrasive Material	Aluminium Oxide
Weight	45 g
Product Type	Slip Stone
Grade	Fine
Shape	Triangular
Depth	11-5 mm
Grit	A400
Length	100 mm
Width	25 mm
Brand	Kennedy
