

DWYER Analog Manometer | Range -12 to 12 in wc | Flex U-Tube | 50 psi Max. | 130°F Max Op Temp, Green

These portable manometers have a flexible u-shaped tube that unrolls when in use, but goes slack and can be easily rolled up for storage when not in use. They keep an eye on the static pressure in filters and ducts. These portable manometers are used for on-the-spot inspections in laboratories and specific HVAC applications where it is necessary to monitor the flow of air.
