

Elitech IR-200 | Infrared & Heated Diode Refrigerant Leak Detector | For Air Conditioner And Automotive Repair

The first dual-sensor refrigerant leak detector in the world is the IR-200 2-in-1 leak detector. It integrates heated diode and infrared sensors that are simple to switch between two modes for. All the materials required for expert leak detection: Leak detector, case, UV LED light, charging cord and adapter, replacement/extension probe, and five replacement filters are all included with the Elitech IR-200. As a result, you will have everything you need to perform efficient and accurate leak detection.

Specifications	Details
Alarm	Audible and visual alarm; TFT indication
Operates between	Temperature: -10Â°C~ 52Â°C; Humidity: Maximum 90%RH (non-condensing)
Dimensions	201 x 72 x 35mm(7.9â€x2.8â€ x1.4â€)
Weight	450g (15.9oz) 
Charging time	Approx 4h
Battery	2 x 18650 lithium battery
