

Elitech LD-100+ | Heated Diode Refrigerant Leak Detector | HVAC AC Sniffer Automotive

The Elitech LD-100+ is a compact refrigerant leak detector that can identify any halogen refrigerant thanks to its accurate control circuitry and heated diode gas sensor. Your work is made easier and more convenient by its high sensitivity, quick response time, consistent performance, and variety of features.

This may be done in both automatic and manual modes, making it appropriate for finding leaks in a variety of intricate settings.

It has a revolutionary suction structure design that enhances sensitivity and simultaneously has an anti-water absorption function, in addition to its exceptional performance and practical advantages.

Specifications	Details
Operating Temperature	0-50°C
Humidity	<80%RH(non-condensing)
Probe Length	 420mm(16.5in)
Battery Life	7 hours
