

Temtop LKC-1000E | PM2.5 PM10 Air Quality AQI Monitor | HCHO(Formaldehyde) Particles AQI Detector

One of the biggest threats to health can be poor air quality, particularly during the summer when dry weather and a rise in wildfires are common. Keeping an eye on the air around you and your family is a crucial step. The optimum time to relocate or take appropriate action to improve the quality of the air around you can be determined by knowing the present state of the air. A portable and dependable air quality monitor is the Temtop LKC-1000E. For individuals who have recently moved into a new home, the monitor also has a dart formaldehyde detector. It counts with a Temtop particulate matter sensor, which can detect particles as fine as 2.5 and 10.

Specifications	Details
Dimensions	6.97 x 2.56 x 1.26 inches; 14.4 Ounces
Battery	1 Lithium ion batteries required. (included)
Measuring range	PM2.5: 0~999 ug/m ³ PM10: 0~999 ug/m ³ HCHO(formaldehyde): 0~2 mg/m ³
Temperature Range	0-50 °C
Humidity	0-90% RH
